

FOR IMMEDIATE RELEASE

Indecomm Technology Partners with Software Outsource Provider SerpicoDEV

Leverages Indecomm Economies of Scale and Local Market Expertise

News Highlights:

- Indecomm Technology names new business partner SerpicoDEV
- Combined expertise to expand client base
- SerpicoDEV and Indecomm Technology share a strategic focus on customer service

Scottsdale, AZ (May 7, 2015)—Indecomm Technology Services is pleased to announce that they have formed a new business partnership with [SerpicoDEV](#), an outsourcing software development company. SerpicoDEV will help leverage Indecomm Technology’s strategic outsourcing software development services and established leadership in Mobility, Cloud, SaaS, Big Data, and Test Automation for SerpicoDEV clients.

“Indecomm specializes in setting up extended software engineering teams who operate as if they are employees of a client company as they help build and maintain products for them,” said Vincent Serpico, CEO and Software Solution Expert, SerpicoDEV. “Those teams have a low turnover, which is a third of the average turnover in the industry, reflecting the commitment Indecomm has to its clients. This is a significant advantage to customers as we combine with Indecomm’s established business of detailed engineering processes. We are excited to extend

Indecomm's deep technical expertise to clients appropriate for the scale of Indecomm Technology's platforms."

SerpicoDEV specializes in working closely with business stakeholders and translating their needs into successful software applications. SerpicoDEV has designed and built numerous software applications from initial concept to conclusion, leading many teams along the way.

"We are selective in our partnering, but when we find someone of SerpicoDEV's capabilities, it's a natural fit," said Pat Stoner, Vice President of Sales, Indecomm Technology. "SerpicoDEV shares our values. It is dedicated to creating great software and focuses on customer service, which mirrors our philosophies."

"Indecomm Technology has a successful outsourcing model that provides software development companies with value they aren't finding in the competition," Serpico said.

"SerpicoDEV's new and existing clients can greatly benefit from this."

Indecomm Technology Group services include:

- Off-shoring teams in Bangalore (India), Pune (India), Singapore, Malaysia, Indonesia, and Manila (Philippines)
- Near-shoring teams in Costa Rica
- Strategic Staffing in the US (currently over 400 people)
- Automated testing software (AutomationNG) and related services
- eLearning Software including Authoring, LMS and University portal as well as content development services
- Product marketing content development services
